

Air Handling Units

In addition to various types of coils, casings and housings, we can also design and manufacture complete, robust industrial air handling units and other custom components.

- Return and Make-up Air Units
- Face & Bypass Units
- High Pressure Skid Mounted
- Filtration
- 30% roughing filters to HEPA filters
- Blowers/fans
- Dampers
- Access doors and panels

Packaging these components together allows us to create a custom product that directly matches your specifications, lowers your packaging and installation costs while providing single source responsibility.

Peace of Mind

Our 5-Year Warranty. Durable. Reliable. Proven.

Peace of Mind, our 5-Year warranty, demonstrates our products are engineered to perform and built to last. Since 1995 we have stood behind our work. Durable. Reliable. Proven. Ultimately, this is about your peace of mind. Contact us today to learn more.

Reasons Why Our Warranty Holds Up

PRESS-FIT FINS & UNEXPANDED TUBE

- Very strong fin-to-tube bond with excellent heat transfer.
- Tubes remain in “mill-direct,” most desirable annealed and corrosion resistant condition.
- Tubes are never expanded or grooved.
- No manufacturing stresses are added.

FREE-FLOATING, SEGMENTED PLATE DESIGN

- Coils constructed using multiple segmented fin bundles.
- Accommodates unequal thermal expansion and contraction between the fins and headers.
- Critical in medium to high temperature and/or pressure applications.
